SUMMARY

Engineer completing an MSc in Cybersecurity (UOC, 2026) with hands-on penetration testing experience on a 5-machine Dockerized CTF environment. Currently working as a Junior Data Engineer with daily use of Python, Bash, PowerShell and Linux, including log analysis and production incident troubleshooting. Familiar with Nmap, Metasploit, Nessus, Hashcat and common offensive security tooling. Seeking a junior role in SOC operations or penetration testing.

EXPERIENCE

Junior Data Engineer

Nov 2024 – Present

Fundación General ULL (University of La Laguna Foundation)

- Build and maintain ETL/ELT pipelines with **Apache Airflow** (daily scheduled DAGs) across multiple databases on Linux servers.
- Develop **Python**, **Bash** and **PowerShell** scripts to automate data processing and system tasks, replacing manual and RPA-based workflows.
- Perform **log analysis** and production incident troubleshooting across DAG failures, deployment errors and CI/CD pipeline issues, ensuring data integrity across automated workflows.
- Design **Apache Superset** dashboards to monitor data flows and operational metrics for end users.

Industrial Technical Engineer

Jul 2023 – Aug 2024

B&G Energy Solutions

- Developed photovoltaic (PV) and electric vehicle charger projects, including technical documentation for permitting.
- Prepared budget proposals and coordinated materials, personnel and equipment on site.

EDUCATION

Master's Degree in Cybersecurity and Privacy

Sep 2023 – Jun 2026 (*in progress*)

Universitat Oberta de Catalunya (UOC)

- **Master's Thesis (TFM):** penetration testing on 5 Dockerized vulnerable machines; applied enumeration, vulnerability exploitation and privilege escalation techniques, documenting full methodology and remediation.
- **Coursework:** network and web enumeration, vulnerability exploitation, offline and online password cracking, secure systems and cryptography.

Bachelor's Degree in Industrial Electronics and Automation Engineering

Sep 2016 – Jun 2021

Universidad de La Laguna

CERTIFICATIONS & TRAINING

- **Google Cybersecurity Professional Certificate** – Coursera
- **Technical Cybersecurity Foundations Course** – INCIBE (Spanish National Cybersecurity Institute)
- **Intensive Cybersecurity Course (250+ hours)** – The Valley Digital Business School, 2023

TECHNICAL SKILLS

Offensive Security: Nmap, Nessus, Metasploit, Burp Suite, Gobuster, Hashcat, John the Ripper

Network & Authentication Testing: Hydra, Medusa

SOC & Monitoring: Log Analysis, Incident Triage, Splunk, TCP/IP, DNS, HTTP/S

Programming & Scripting: Python, Bash, PowerShell, SQL

Systems & Tools: Linux, Windows, Docker, Git, Apache Airflow, Apache Superset

Languages: Spanish (native), English (B2 Certificate)
